Strength	EE A' is a reliable and fully committed to deliver value. His adaptability and and flexibility are evident in the way he manages his work especially when supporting the team. He would not hesitate to jump in to support even if it means picking up slacks from others. He is truly a team player that values overall team success, whilst keeping an eye on his own achievements and contributions.
Area of Development	EE A' system technical knowledge is clear and obvious, people gravitate towards him for this topic and always the go-to person. Whilst this is extremely useful considering a large part of what we do relies on system technology, and a comfort zone for EE A, I would encourage him to continuously challenge himself to start immersing in the functional and strategic aspects of TM. Often these are not tangible and readily shaped issue available for attention, ability to conceptualize, and identify these trends and patterns and circumstances are the first steps Be the go-to person on all things talent in the region, trusted partner in managing challenging talent landscape, and then design and execute interventions to drive elevated regional talent outcomes are his primary responsibility.
Development Plan	Inspire to be an HR Expert and gain more knowledge of the Talent Management Processes & Practices
